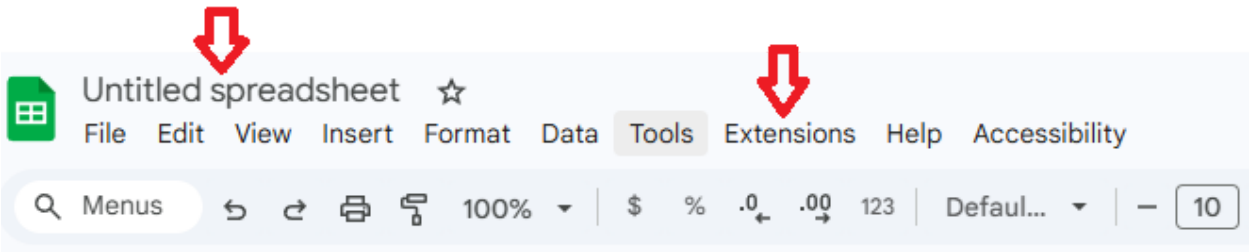
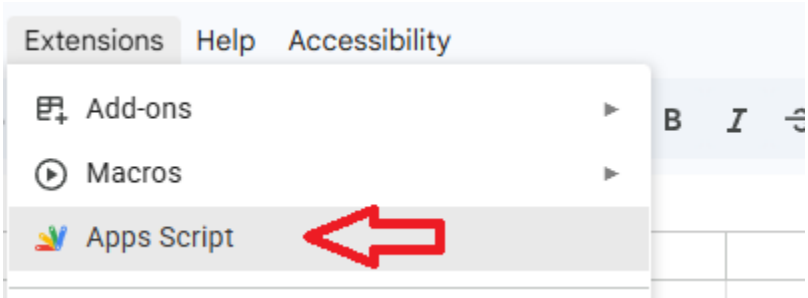
Google Sheets Setup

This section can probably be skipped, if you have been given a link to the sheet itself then the sheet has beenSsetup for you by someone else, and you will possibly just need to give permission to run it.

If you are installing this from the very start open google sheets. Select a name for your sheet and then click extensions:



Click on App Scripts:



Under Code Highlight and remove the 4 lines that are there by default and copy the code.gs file into its place.

```
const APP_TITLE = 'ESO Item Share';

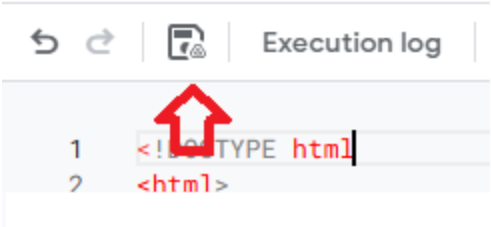
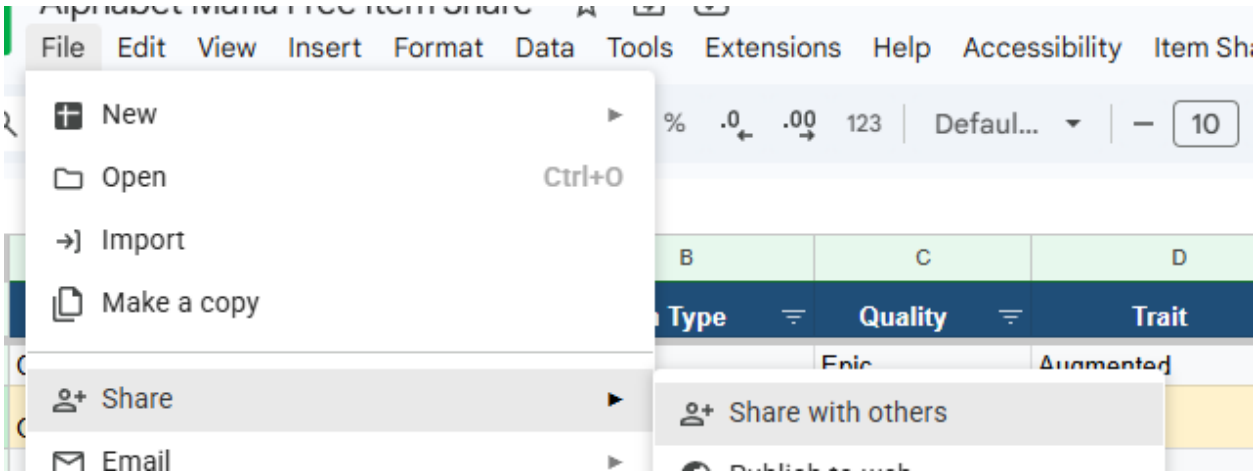
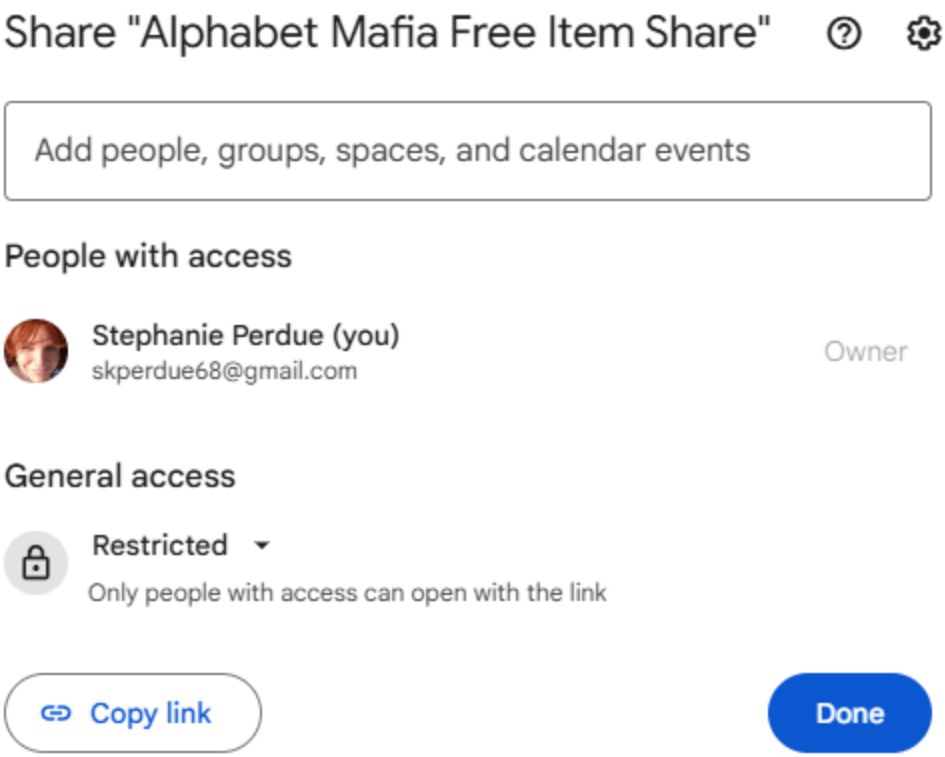
Click the Save button



Go to File, Share, then Share with others:

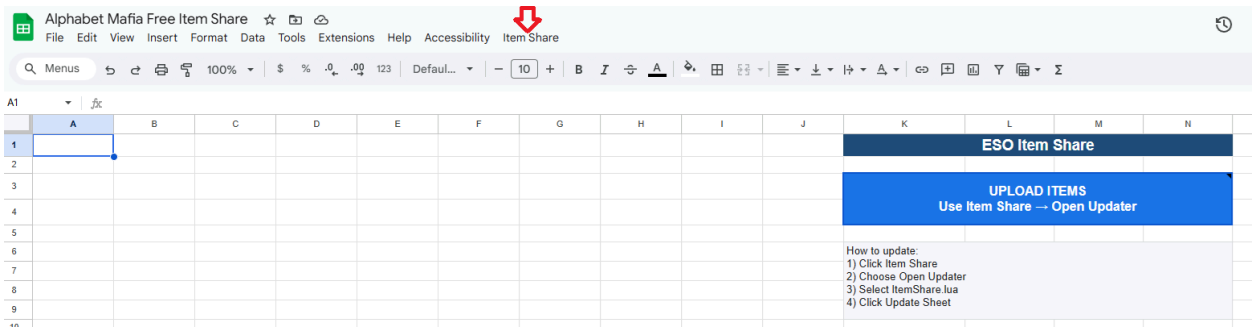


You may either add people that have permission, or may set it to anyone with the link

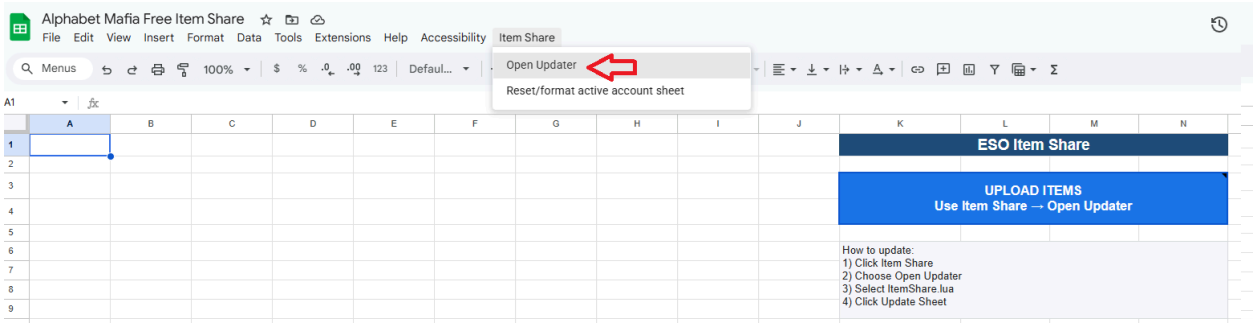


The following are the instructions for processing your ItemShare information from the ESO ItemShare AddOn. This uses Google Sheets (In order to allow cloud functionality and people being able to add multiple users who are supplying items up for free). The first time you run this you will have to go through a few additional steps (steps 3-7), after you approve this you shouldn't see those steps in the future unless you create a whole new spreadsheet.

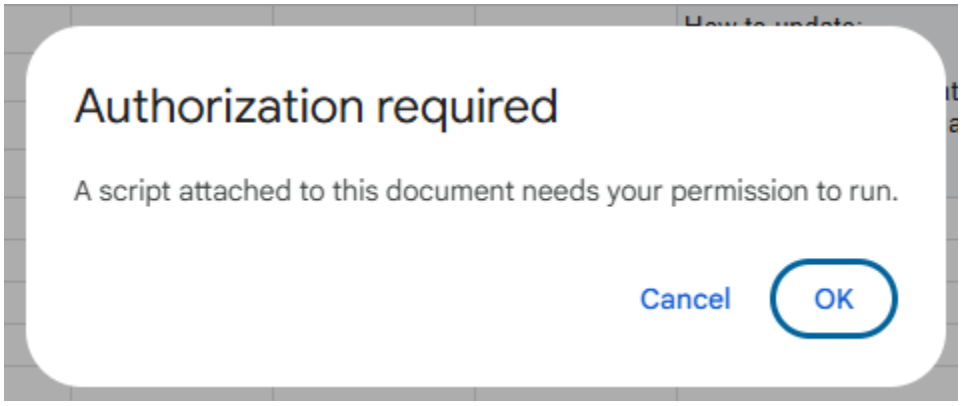
1) Click Item Share



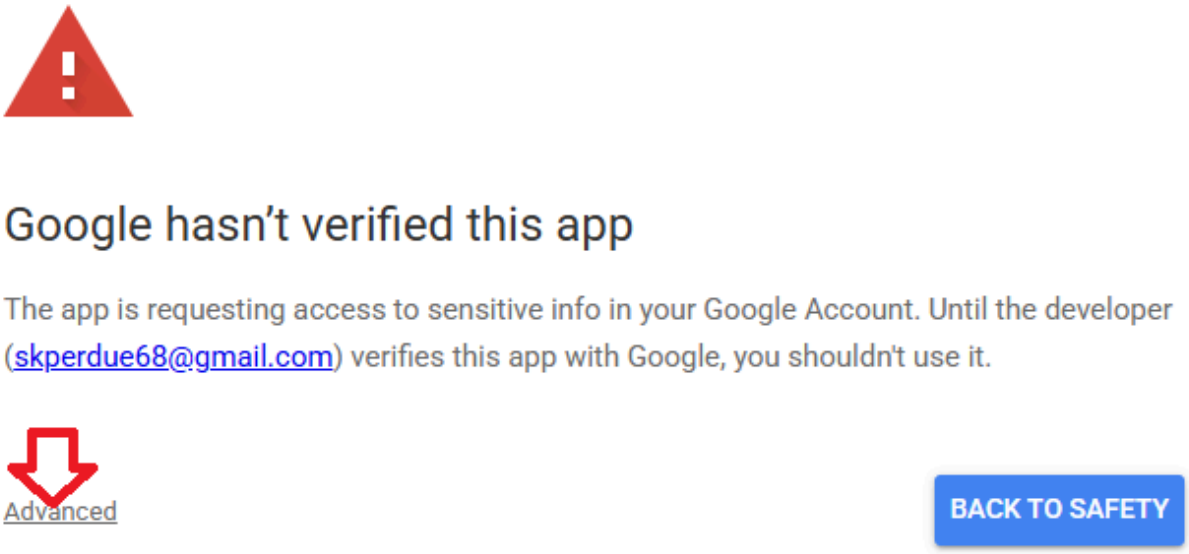
2) Click Open Updater



3) Click OK



4) Click Advanced



5) Click Go to Alphabet Mafia Free Item Share
